English
Fluent

Experience

Elbit Systems

2022-2024

Software Developer

- Developed Internal Tools Driving Engineering Efficiency:** Designed and built full-stack tools and Jira plugins (React, JavaScript, Java, Groovy) that reduced manual work and improved daily workflows for engineering teams.
- Built Data Analysis APIs for Leadership Visibility:** Developed secure Node.js + MongoDB services exposing user and project analytics with permission-based access, giving managers visibility into project health and team activity.
- Engineered Cross-System Configuration Auditing:** Created a Python + React engine to detect config differences between Jira and Confluence instances. Reports were generated daily via a Jenkins job, improving compliance.

Enhanced Jira Test Management Workflow: Developed a Jira plugin using React and tree-based algorithms that streamlined test planning, replicated folder structures, and significantly improved QA team efficiency.

Rescue Anxiety App

2024

Frontend Developer

<https://rescueanxietyapp.org>

- Contributed to a React Native App for Anxiety Relief:** Developed features using Redux, Navigation, Animations, and Sound integration. Implemented timer animations, per-exercise duration settings, and a navigation bar.
- Maintained Code Quality and Stability:** Fixed bugs, performed refactoring, and optimized performance across components involving animations, sound, and navigation.

Education

Yezreel Valley College

2020-2023

Information Systems, Specialization in Software Development B.Sc.
94.13

Academic Excellence Certificate

ORT Bialik High School

2015-2017

Software Engineering & Physics
